

Uptown

Upgraded living

Located in 600 Castle Peak Road Hung Shui Kiu, Uptown is a residential development developed by Clayton Power Enterprises Limited. A team of professional is commissioned to design and manage the project; the core members include Ho & Partners Architects Engineers & Development Consultants Ltd, Ove Arup & Partners Hong Kong Ltd and ADI Limited.

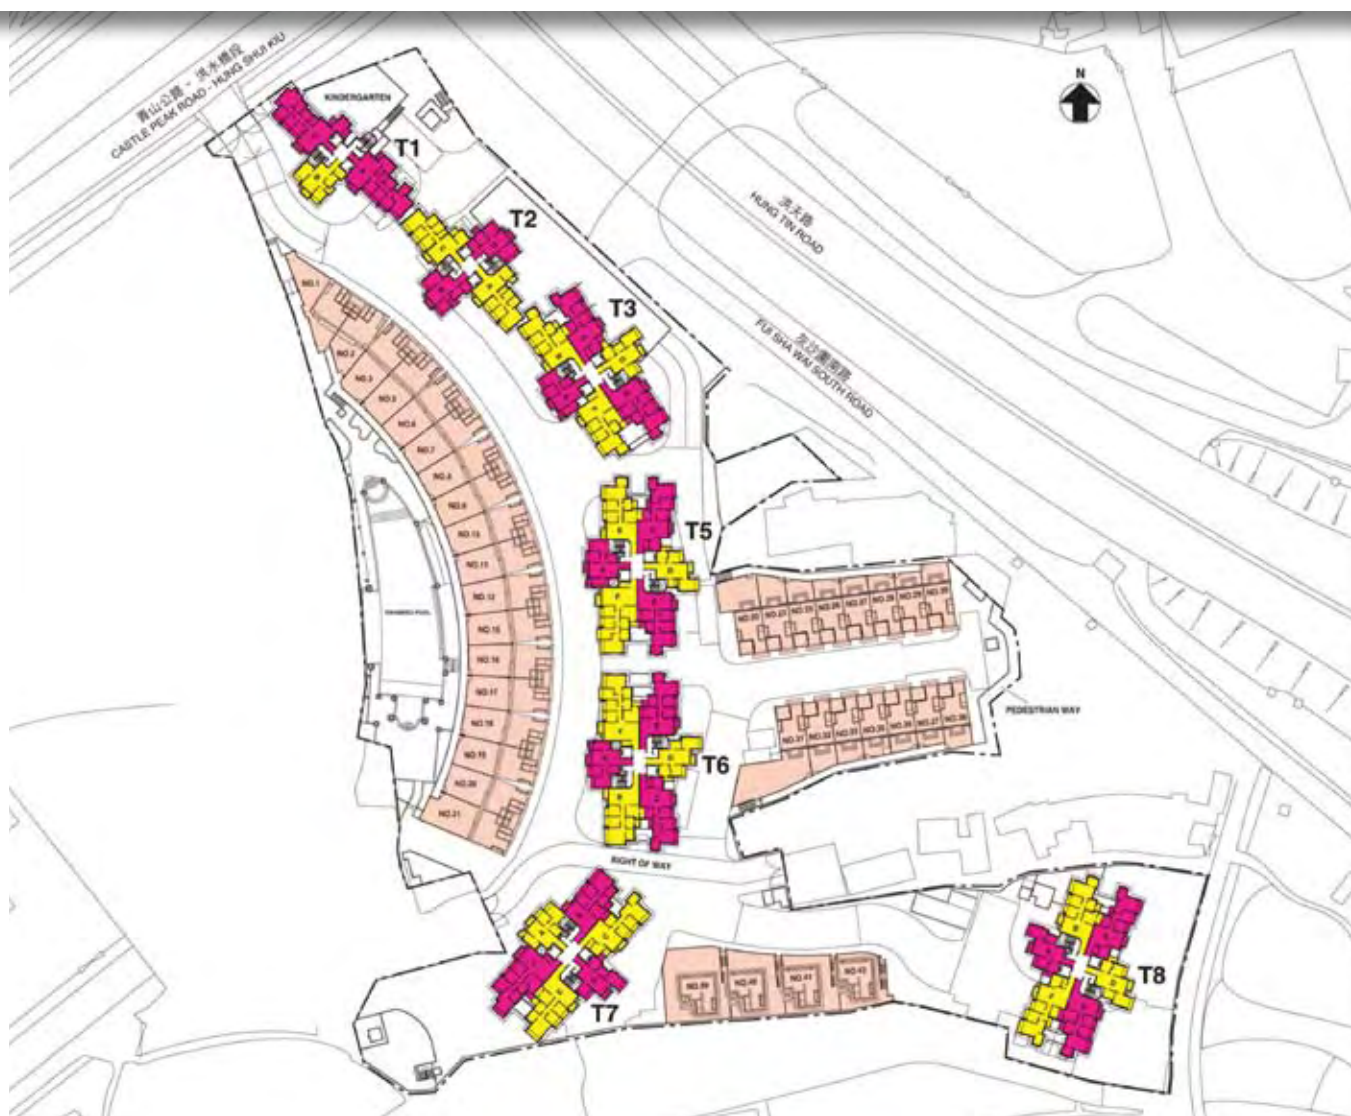

Uptown is located in Hung Shui Kiu which will be the core development town in the coming years. Connected to the city's major infrastructure network, there is strong guarantee on the investment value of the project. In addition, unlike any high density town, the site keeps the low density profile and most of the flats are surrounded by greenery without any blockage towards the view.

Uptown consists of 734 residential units in 7 towers, 35 townhouses and clubhouses. Every unit has green balcony and utilities platform and that enhances the quality of life for the owner by bringing the outdoor space indoor.

Three different types of townhouses are connected to form the low density and deluxe living zone. Every townhouse has its own garage and private garden space.

Uptown adopts a neo classical modern style, with the master crafted stone décor. This not only shows how luxurious the project is also commensurate with the taste of the potential buyers. The same architectural style is also brought into the interior of the residential unit with the same luxury decor. In addition to all these extravagances owner can also enjoy the six-theme clubhouses which provide more than 40 different types of entertainment.
